Discounted Cash Flow Valuation
LEARNING OBJECTIVES
After studying this chapter, you should be able to:
LO1 Determine the future and present value of investments with multiple cash flows.
LO2 Explain how loan payments are calculated and how to find the interest rate on a loan.
LO3 Describe how loans are amortized or paid off.
LO4 Show how interest rates are quoted (and misquoted).
AI Reader BETA
Explanation
Athlete contracts, like Willson Contreras' $87.5 million deal, seem impressive but can be misleading due to the time value of money. It's like receiving a treasure chest in installments; its worth today isn't the same as its future value. Understanding this concept helps reveal the true financial picture behind such high-profile deals.
